Reports were tabled and approved

5.1.2 Investment Strategy

It is proposed that funds of \$536,506.14 in the Property Investment online saver account be transferred to a new term investment account. Current interest in the online saver is 3.5% compared to 4.15% for a 3 month term. A 3month term is proposed in order that funds accumulating from the new rider levies can be rolled over to boost the balance. The strategy will involve transferring all income from levies to the Property Investment online saver account to earn interest at 3.5% until the term account matures, on maturity the balance can be transferred, maximising returns.

It is also proposed to transfer funds of \$439,215.80 in the Holding online saver account to a 7 month term investment account at 4.2%. An amount of \$100,000 will remain to ensure cash flow variations are taken into account and will earn 3.5%. At the expiry of the term any amount in excess of \$100,000 will be rolled into the investment account to maximise interest.

Board resolved to accept the proposal.
